SMARTCODE SOLUTIONS

SmartCode VNC Manager™

Award Winning Remote Computer Management Software

NETWORK MANAGEMENT WITHOUT BARRIERS

In today's large corporate computer networks, with hundreds of computers located across the globe, the ability to effectively manage all of these computers is the key to the efficient use of staff time and can be a major cost saving factor.

With SmartCode VNC Manager you can **control, manage and monitor computers from anywhere**. It is designed for effective remote network management, remote system administration and for helpdesk environments.

SmartCode VNC Manager supports dozens of technologies, such as RDP, VNC, SSH, VPNs, along with more than 30 built-in remote computer management tools.

SmartCode VNC Manager is used by thousands of small, midsized and large businesses worldwide. It empowers the IT administrators with tools to improve productivity, while reducing costs and risks, throughout the organization.

CENTRALIZED ADMINISTRATION

Administrators have quick access to all the management and administration features available in a single console. SmatrCode VNC Manager includes over twenty tools that simplify management of Windows XP/Vista/ Windows 7/8/10 computers and Windows Servers. Administration can be performed across a local network as well as over a VPN, or the Internet.

REMOTE CONTROL

SmartCode VNC Manager is the only application on the market that includes VNC, RDP, Citrix ICA, RAdmin, SSH, Telnet, Hyper-V Virtual Machine viewer, Microsoft Virtual Server and a Web browser as a screensharing clients integrated into the application user interface. Most of the other product simply launch them as external applications.

REAL-TIME MONITORING

SmartCode VNC Manager allows you invisibly monitor your entire network computers with VNC and Microsoft Hyper-V virtual machines thumbnails views. Or you can scan your network for online servers and workstations using sophisticated network scan feature.

EASE OF USE

SmartCode VNC Manager is easy to learn. Its intuitive interface and smart defaults means there's no steep learning curve, so you can start using it immediately. The customizable interface can be tailored to your exact needs and preferences.

VNC & HYPER-V THUMBNAILS VIEWS

SmartCode VNC Manager was the first application to introduce VNC thumbnails view. The latest release takes this feature one step further by adding the support for monitoring of Microsoft Hyper-V virtual machines running on Windows Server 2008/2012/2016

EASY VNC DEPLOYMENT

SmartCode VNC Manager includes the VNC Deployment Wizard for unattended remote VNC deployment. No other VNC deployment solution offers such advanced features as ours. The Wizards supports deployment of the latest versions of UltraVNC, RealVNC and TightVNC.

EXECUTE SOFTWARE REMOTELY

SmartCode Remote Exec supports three methods of remote command execution: "psexec.exe"-like, Windows RM and SSH shell. With this feature an administrator can execute applications and scripts on remote Windows and Linux/Unix computers.

INCREASE ROI and LOWER TCO

Our studies indicate that SmartCode VNC Manager delivers a high return on investment (ROI) ratio. SmartCode VNC Manager allows IT departments to increase their productivity without increasing headcount.
