

# SmartCode VNC Manager™ v5.0

Award Winning Remote Computer Management Software

# WELCOME TO NETWORK MANAGEMENT WITHOUT BARRIERS

In today's large corporate computer networks, with hundreds of computers located across the globe, the ability to effectively manage all of these computers is the key to the efficient use of staff time and can be a major cost saving factor.

With SmartCode VNC Manager 5.0 you can access and control computers from anywhere. It is a powerful remote administration and monitoring software application for both the business and home network environments. It is typically used for remote network management, remote system administration and in helpdesk environments. The application allows you to take remote control of any computer running VNC, Remote Desktop Services, Citrix ICA, Microsoft Hyper-V, Microsoft Virtual Server 2005, RAdmin, SSH, or Telnet servers.

SmartCode VNC Manager was created to give you an easy-to-use yet powerful tool to manage, monitor and remotely control your computers. The VNC Manager software is used by thousands of small, mid-sized and large businesses worldwide.

## CENTRALIZED ADMINISTRATION

Administrators have quick access to all the management and administration features available in a single console. SmartCode VNC Manager includes over twenty tools that simplify management of Windows NT/XP/Vista/Windows 7 computers. Administration can be performed across a local network as well as over a VPN, or the Internet. Most of the VNC Manager's management tools optimized for simultaneous management of several computers at once.

## REMOTE CONTROL

SmartCode VNC Manager is the only application on the market that includes VNC, RDP, Citrix ICA, RAdmin, SSH, Telnet, Hyper-V Virtual Machine viewer, Microsoft Virtual Server and a Web browser as a screensharing clients integrated into the application user interface. Most of the other product simply launch them as external applications.

## REAL-TIME MONITORING

SmartCode VNC Manager allows you invisibly monitor your entire network computers with VNC and Microsoft Hyper-V virtual machines thumbnails views. Or you can scan your network for online servers and workstations using sophisticated network scan feature.

## EASE OF USE

SmartCode VNC Manager is easy to learn. Its intuitive interface and smart defaults means there's no steep learning curve, so you can start using it immediately. The customizable interface can be tailored to your exact needs and preferences.

## VNC & Hyper-V THUMBNAILS VIEWS

SmartCode VNC Manager was first application to introduce VNC thumbnails view. The new v5.0 release takes this feature one step further by adding support for monitoring of Microsoft Hyper-V virtual machines running on Windows Server 2008 and 2008 R2.

## EASY VNC DEPLOYMENT

SmartCode VNC Manager includes the VNC Deployment Wizard for remote VNC deployment. No other VNC deployment solution offers such advanced features as ours. The Wizards supports deployment of the latest versions of UltraVNC, RealVNC and TightVNC.

## EXECUTE SOFTWARE REMOTELY

SmartCode Remote Exec supports three methods of remote command execution: "psexec.exe" Like, Windows Remote Management shell and SSH shell. Using this feature an administrator can execute applications or remote software installations on Windows and Linux/Unix computers.

## INCREASE ROI and LOWER TCO

Our studies indicate that SmartCode VNC Manager delivers a high return on investment (ROI) ratio. SmartCode VNC Manager allows IT departments to increase their productivity without increasing headcount.

# SMARTCODE VNC MANAGER 5.0 FEATURE COMPARISON

VNC Manager is available in two editions - Enterprise and Standard - to meet the diverse needs of IT professionals.

	Enterprise	Standard
<b>Connectivity</b>		
VNC viewer with TightVNC/UltraVNC file transfer and UltraVNC chat support	●	●
VNC viewer with HTTP / SOCKS5 proxies, UltraVNC Repeater and MSRC4 DSM plug-in support	●	●
RDP, Telnet, and Web browser clients	●	●
Hyper-V Virtual Machine (vmconnect.exe replacement) and Microsoft Virtual Server 2005 clients	●	
SSH client	●	
RAdmin client	●	
SSH tunneling of VNC/RDP/VMRC sessions	●	
<b>Remote Management</b>		
Restart / shutdown computer	●	●
Installed Software Manager	●	●
Service Manager	●	●
Registry Editor	●	●
Send Wake-on-LAN "magic packet", Send Console Message	●	●
Query MAC address	●	●
Share , Printer and Device Managers	●	
Computer Domain / Workgroup Membership Manager	●	
Task Manager	●	
WMI (Windows Management Instrumentarium) Query Manager	●	
Microsoft Hyper-V Server Manager	●	
Microsoft Terminal Server Settings Manager	●	
Remote program execution	●	
Rename computer	●	
<b>Monitoring</b>		
VNC thumbnails view	●	●
Microsoft Hyper-V Virtual Machines thumbnails view	●	
Dynamic Search Folders - VNC / RDP / Citrix ICA / SSH / Ping network scan	●	●
Detect installed VNC distribution version	●	●
Integrated Windows domain and workgroup computers browser with VNC / RDP status information	●	
Show "Who is Logged On" to remote PC	●	
<b>Other</b>		
Wizard: VNC Deployment Wizard with RealVNC, UltraVNC and TightVNC deployment support	●	
Wizard: Reset Remote VNC Server Password wizard	●	
Wizard: Active directory and workgroup Computers Registration Wizard	●	
Wizard: SSH Key Generation and Upload Wizard	●	
Customizable "external tools" and "action scripts"	●	
Automatic VPN connection	●	
Active Directory integration features	●	
User-defined properties that can be assigned to a registered computer	●	
Log RDP / VNC / SSH / Citrix ICA / Telnet sessions to Windows Event Log	●	

● - Feature supported

● - Feature partially supported

## PRODUCT LICENSING TERMS

SmartCode VNC Manager is licensed per Administrator that will use the software. Each licensed administrator can manage as many remote computers as they like.

## OUR COMMITMENT

We thrive on our users' success. Personal contact and feedback is extremely important for SmartCode Solutions. We don't have an impersonal outsourced call center but pride ourselves in connecting every call to our friendly, knowledgeable and competent support team.
